

WebStat¹ – Website Visitor Statistics

September 21, 2009

The WebStat utility program is provided with all websites hosted by Strategic Mapping & Data Services LLC. This utility program is executed each time a person visits your website and collects the following information:

- Time/date of visit
- Country of origin
- Referring host
- Remote host (IP address of visitor)

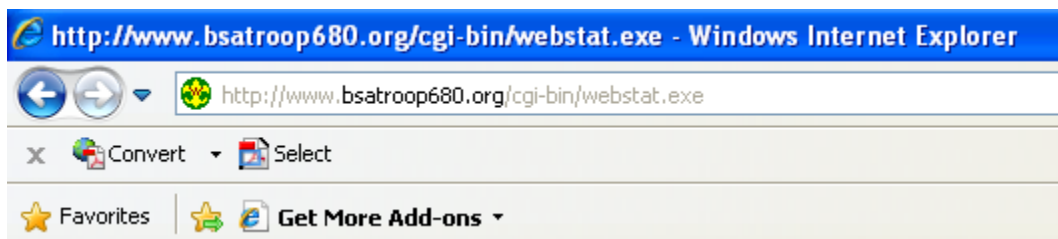

The collection of this data is initiated when a visitor to your website views specific pages that have a link to the WebStat utility program. With this collected information, the WebStat utility provides both numeric as well as graphical presentation of the visitor statistics which are viewed on-line anytime you desire.

Viewing WebStat Statistics:

To view your website statistics, you need to type in your browser your website address followed by “/cgi-bin/webstat.exe”. For example to view the statistics for the www.bsatroop680.org site, you would type the complete address as:

<http://www.bsatroop680.org/cgi-bin/webstat.exe>

as example of this being entered into the web browser is shown below:

After a few seconds of typing in the address the WebStat statistics screen is displayed (as shown on the sample screen capture on the next page).

¹ WebStat was originally written by L. Ackerman

What does the WebStat report show?

The WebStat report is segmented into 4 sections. These sections are:

- **Summary of visits:**

This summary includes hits seen today, last 7/30/365 days. A sample of this section looks like:

Summary 9/21/2009 11:32:02 AM			
Hits today:	2	Hits last 24 hours:	16
Hits last 7 Days:	101	Average last 7 days:	14
Hits last 30 Days:	443	Average last 30 days:	14
Hits last 365 Days:	5605	Average last 365 days:	15
Top last 30 Days:	21 (9/1/2009)	Top last 365 days:	38 (1/7/2009)

- **Specific details on last 20 visitors:**

The time/date, country of origin, remote IP address and remote host name, type and version of web browser, and referring host. The referring host is probably the most important piece of data captured by WebStat. As shown on the sample screen (next page) the referring host is usually a search engine that the visitor was using to find your site, or if your websites address is shown the user typed your address directly into their browser.
